Certification at a Prometric Test Center

The Cúram Education Team is pleased to announce that you can now take a Cúram Certification Test in a Test Center. There is a limited number of Test Centers around the world. You can use the Prometric scheduling system to check whether there is a Test Center near you.

Browse to the [Merative | Prometric](#) page to make a test center appointment. You'll notice that our Prometric landing page has been updated to include the Test Center option. To take a test at a Test Center, click Schedule on the Test Center Exam card and step through the booking process.

In addition, you can still book an appointment for a remotely delivered test on the same page by clicking Schedule on the Remote Exam card to open the scheduling app and enter your eligibility code

Merative Cúram Express Rules for Developers 8.X

This training course is designed to provide students with a technical understanding of developing Cúram Express Rules (CER) for Merative Cúram.

It gives students a practical understanding of this complex area of the Cúram product and is vital for anyone seeking to implement the Eligibility and Entitlement (plus Decision Details) rules that Product Delivery cases rely on. It is also beneficial for those seeking to develop Screening and Evidence Validation in Cúram, where CER can play a significant role.

- **Course delivery format:** Instructor-Led (recommended) or Self-Paced
- **Course duration:** 32 hours
- **Prerequisites:** Students should take **Course CUR090 Merative Cúram for Developers (ADE)** and **CUR091 Merative Cúram for Developers (Customization)** before they enrol for this CER course.

Merative Cúram 8.X Technical Overview

This course provides students with a high-level technical understanding of Merative Cúram.

A good understanding of the Cúram development environment, its technologies, and associated concepts is essential for all technical roles involved with Cúram implementations.

Learners will explore end-user features during the exercises before investigating the technologies that provide these features, giving learners an end-to-end view of how the product is used so they can relate the underlying technologies to the business features.

- **Course delivery format:** Instructor-Led or Self-Paced
- **Course duration:** 16 hours
- **Prerequisites:** Students must have a basic understanding of n-tier app development and associated architectures, including web development technologies. It is recommended that students complete **Course CUR087 Introduction to Merative Cúram Platform 8.X: Functional Overview** course before taking this course.

Merative Cúram Financial Management

This course discusses the main features and functionality of Cúram Financial Management, which is part of the Cúram Platform.

The course introduces the key elements of Cúram Financial Management, namely, Financial Component, Instruction Line Items (ILIs), Financial Instruction, Financial Instrument, and Payslip. The course also provides a sample scenario that illustrates how Financial Management can facilitate the transactions that Social Services organizations need to process.

- **Course delivery format:** Instructor-led or Self-Paced
- **Course duration:** 3 hours
- **Prerequisites:** Students should have a working knowledge of the Cúram platform and already taken **Course CUR087 Introduction to the Merative Cúram Platform 8.X: Functional Overview**.
